

FREEZER SPRAY

Product Information

This is a rapidly evaporating propellant mixture suitable for reducing surface temperatures of electrical components to aid detection of overheating and similar faults. It is also often used to freeze water in small bore pipes to effect a repair avoiding the necessity of system drainage.

Further use can be found as a highly effective chewing gum remover.

NOTE: Will cause a "cold" burn if in contact with skin tissues.

Directions

Spray directly onto affected component using the extension tube.

For chewing gum removal, apply to gum until frozen, then pull or chip away.

Please consult separate Safety Data Sheet for Health and Safety advice.

Ozone Friendly	Yes
Flammable Symbol Required	No
Harmful X Required	No
